About the Agora Market

Agora is a so-called "darknet market" on the Tor network, devoted to the sale of various items, both legal and illicit. Agora uses Bitcoins as currency, which allows for near-instant payments and total anonymity when used correctly. The market's primary focus is pharmaceuticals and chemicals, but other item categories exist as well.

This subreddit and its moderators are not affiliated with the administrators and staff of Agora. This is a public resource for discussion of Agora and the items it offers. It's important to note that content on this subreddit may be posted by *anyone* – the moderators here are not responsible for the legal implications of any content posted here.
